Failure of Technology Mission on Oilseeds

758. SHRI SURESH PACHOURI: Will the Minister of AGRICULTURE be pleased to state whether due to failure of Technology Mission and other R&D Projects on oilseeds Government may have to import edible oils and if so, whether Government would fix responsibility in the matter?

THE MINISTER OF STATE IN THE DEPARTMENT OF AGRICULTURE AND IN THE MINISTRY OF AGRICULTURE (SHRI MULLAPPALLY RAMACHANDRAN): There has been sustained growth in area, production and yield in oilseeds during the Seventh Plan period. During the period 1985-86 to 1990-91, the production of oilseeds rose from 10.83 million tonnes to 19.10 million tonnes i.e. a percentage increase of 75 percent not matched by any other crop. Against the target of 18 million tonnes fixed for 1990-91, the production reached an all time record of 19.10 million tones. The strategies accepted and the programmes undertaken by the Technology Mission have been important contributory factors for this impressive increase in production. Imports of edible oils have shown a declining trend. Government has taken no decision regarding import of edible oil during the current financial year. Arising from higher production, exports of oilseeds, extractions and oils have, on the other hand, increased rapidly. The oilseeds sector has become a substantial net foreign exchange earner.
